EDUCATION

University of Northampton

Northampton, UK

Bachelor of Science in Software Engineering (Honours)

Sep 2022 – June 2026 (Expected)

Relevant Modules: Data Structures and Algorithms, Modern Database Development, Web Programming, Computer Networking, Mobile Application Development.

Grade: First Class

Academic Scholarship: Awarded a merit-based scholarship for ranking in the top 5% of the computing cohort.

WORK EXPERIENCE

Software Engineering Industrial Placement, AMETEK

July 2024 – July 2025

- Developed *full-stack web apps* using **C#, .NET, React.js, TypeScript** and **JavaScript**, focusing on performance, scalability, and maintainability.
- Engineered full development cycles and maintained 80%+ **unit-test coverage** to ensure high-quality releases.
- Designed, developed, and tested **RESTful APIs** that reduced integration time by **40%** and supported 5+ internal applications, handling **40,000+ requests/week**.
- Built **CI/CD pipelines** using GitHub Actions and Docker, integrating linting, unit/integration tests and vulnerability scans to reduce manual deploys by 70% and achieve zero post-release hotfixes.

Software Engineering Spring Intern, Bloomberg

April 2024 – May 2024

- Developed a data-driven portfolio manager using **Python** and **Jupyter**, integrating 3+ market data APIs to support live asset monitoring and rebalancing.
- Containerised the application with **Docker** and **Docker Compose** to enforce environment consistency and cut setup time by 60%.
- Built and executed 30+ **automated edge case tests** to harden *data pipelines* against volatility, improving processing stability by 45%.

Software Engineering Intern, Bright Network

June 2023 – July 2023

- Developed scalable **Python/FastAPI microservices** using SOLID principles, dependency injection, TDD, and CI/CD in Agile sprints.
- Built secure **GraphQL APIs** with OAuth2 authentication, pagination, caching, and robust error handling.
- Designed and refined SQL database structures, reducing *query execution time* and improved reliability.

Learn Student Ambassador, Microsoft

July 2023 – Present

- Developed and delivered 10+ hands-on workshops on Azure IaaS/PaaS (VMs, Functions, Logic Apps) and Power Platform (Apps, Automate, BI) for 60+ peers.
- Led interactive Azure labs on serverless architectures and Azure SQL, boosting participants' deployment proficiency.

OTHER WORK EXPERIENCE

Code for Good Hackathon Winner, JP Morgan

October 2023

- Led a cross-functional team to architect and deliver a full-stack platform for a charity at JP Morgan's Code for Good London hackathon, securing first prize.

Head of Operations, University of Northampton AI Society

June 2023 – July 2024

- Directed a 200-member AI society, designed and delivered 12+ hands-on workshops on AI integration, retrieval-augmented generation, and model weighting; secured three industry partnerships.

TECHNICAL SKILLS

Languages: Python, C#, JavaScript, TypeScript, Kotlin, SQL, PostgreSQL, SQL Server, MongoDB

Frameworks & Libraries: .NET, React, Node.js, Express.js, FastAPI, GraphQL

Tools & Platforms: Git, GitHub, Docker, Kubernetes, Postman, Jupyter Notebook, Power Apps, Power Automate, Power BI, VS Code
